**Dated: 02/01/2020**

## **NOTICE**

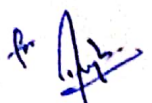

Dear Student, It gives us immense pleasure sharing with you that BITT has adopted the latest technologies to make the entire administration, management & process online. We are developing ERP for a green, digital and next generation campus. All students will have the access of the ERP system with their own unique ID and Password. Our IT team is working hard to ensure that students could get it tentatively by 15th Jan'2020 where students will have a dashboard with their profile details, fees, academic calendar, feedback and other misc modules. Let's build a more vibrant and digital campus together, wishing you all a prosperous year ahead 2020.

In recent years India has chartered a unique and significant path to digitization impact of it is inclusive, empowering and transformative and a present India is amongst top countries of pursuing different dimensions of digital adoption.

BITT is making tremendous progress in the digital infrastructure sphere as establish all around the campus broadband connectivity making internet data the tool for efficient development of students. Through this system of digital learning it is looking to alter positively not just the look of classroom but delivering skill centered courses and digitally supported pedagogical approach with upgraded state of the art computer labs. BITT is looking to create environment of shared learning, rational and continuous learning with focus on exploring different avenues bringing entrepreneurial aptitude, institutional capability, leadership qualities, research and development, simultaneously delivering the different employment driven courses of different branches we are doing now.

BITT focuses on self-employment for all-around holistic development of students. Entrepreneurship skills are primary component of employment and with elements of digital capability it encourages innovation. It lays out an ecosystem to promote a startup opportunities in student with consistent support of different initiatives and establishing advanced incubation labs.

It is looking to create active engagement of students with initiatives like ATAL INNOVATION

MISSION to inspire inventiveness, creativity and resourcefulness and decision-making. Our institute is giving a much needed push to students who are looking to explore their entrepreneurial mindset through rich learning opportunities and with incubator labs providing a broad-based support system in their pursuit to entrepreneurship. Through ATAL INNOVATION MISSION BITT core aim is to serve as platform for culture of innovation hubs, startup businesses & other self-employment activities involving academics, entrepreneurs, researchers drawing upon experiences and promoting novel disruptive ideas that are low cost and durable and customized to social needs.

This is for the information to all students of BITT Polytechnic that college is committed to provide an ideal academic environment for them, which is need of today to compete in the challenging world. But it will be possible only when students and all staff of BITT think and work in same direction. We are fortunate that our students are keen to involve themselves for the betterment of academic environment. We have already an academic committee in the college which will now plan for the year 2020 and it will nominate students member for the committee.

A meeting of the Academic Committee, regarding the functions and nomination of student members will be held on 11/01/2020.
