**Online Summer Internship Programs in IoT/AI and ML/VLSI Chip Design/Embedded Systems**

HexNBit - An Overview

**HexNBit ( <https://www.hexnbit.com/> ) Provides cutting edge New Age Technology Courses focused on IoT-“Internet of Things” , Artificial Intelligence and Machine Learning, Embedded Systems & Robotics, VLSI Chip Design.**

**We are a member of IESA (Indian Electronics & Semiconductor Association) a premier association of Design and Services company from India and abroad.**

Dear Sir/Ma'am,

***I take this opportunity to thank you all for showing interest for the Online Internship Program.***

We at Tevatron have always believed that any situation gives us opportunity to come out with something innovative and good. When the whole world is gripped in fear and uncertainty of COVID-19, our team at Tevatron has worked out this model of Internship along with our Training Arm “**Hex N Bit**” to provide Online Industrial Internship in “**Work From Home**” mode.

As you must be aware that AICTE recently announced that Online Internship would be valid for 6 Week Internship at par. AICTE also has this view that these internships should be around some “Challenging Problems”. Most of the training (internship) programs are only around the Online Modules which is more of a Training rather than Internship but we at Tevatron have come up with “**Online Internship Around Challenging Problems**”.

In order to achieve our target we have added few out of the box features in our programs like: **Project Tracking using Project Management Tools, Access to Faculty for Monitoring, Mentorship during Project, Live Sessions for Understanding of Concepts, Weekly Assignments to keep track of progress, Industry Expert Webinars, eLearning Modules and Assessments.**

We have in collaboration with our training division “**Hex N Bit**” have launched 2 categories of program for the students:

- **Certificate Program – 6 Week Online Internship Around Challenging Problems**
- **Online Internship Program – 4-6 Week Self Paced Internship Programs with Weekly Live Sessions and Webinars and Project without dedicated project support**

#### **Certificate Programs**

- Artificial Intelligence & Machine Learning – Rs. 4999
- Internet of Things – Rs. 4999

- VLSI Design – Rs. 4999

## Online Internship Programs

- Artificial Intelligence & Machine Learning – Rs. 1999
- Internet of Things – Rs. 1999
- Embedded Systems with ARM – Rs. 1999
- Embedded Systems with Arduino – Rs. 1999
- PCB Design - Rs. 1499
- Python Programming - Rs. 1499
- Advanced C/C++ - Rs. 1499
- VLSI Design – Rs. 1999

**All excluding 18% GST** Keeping in view of our commitment for the Long Term Association we would offer these internships **@20% discount** to your college Students enrolling through department/group. For details please call +91-7011967895
