DEPARTMENT OF TRAINING, PLACEMENT, CONSULTING,
INNOVATION & RESEARCH (DTPCIR)

NOTICE

All the students of diploma in EE, ECE, ME of sessions: 2018-21, 2017-20, 2016-19, 2015-18, 2014-17, 2013-16 are hereby informed that a company **“INSTITUTE FOR PLASMA RESEARCH (IPR)”** is shortly going to do online/offline/ recruitment/ placement program.

INSTITUTE FOR PLASMA RESEARCH (IPR)

The Institute for Plasma Research can trace its roots back to early 1970's when a coherent and interactive programme of theoretical and experimental studies in plasma physics with an orientation towards understanding space plasma phenomena was established at the Physical Research laboratory.

The early studies were on simulation of $E \times B$ instabilities characteristic of the equatorial electrojet, plasma-neutral gas interaction with relevance to the cometary plasma-solar wind interaction and single particle confinement in non-adiabatic magnetic mirrors. Experiments on non-linear ion acoustic waves and double layers were added later. High power plasma experiments using intense electron beams to form compact toroids and electron rings in toroidal devices started in 1978 reflected a re-orientation to fusion-relevant experiments. A proposal to the Government of India to initiate studies on magnetically confined high temperature plasmas was accepted in 1982 and resulted in establishment of the Plasma Physics Programme (PPP) supported by the Department of Science and Technology. Design and engineering of India's first tokamak ADITYA started at the same time. In 1984 the activities moved into an independent campus at Bhat village in the outskirts of Ahmadabad city in 1984.

With the decision to build the second generation superconducting steady state tokamak SST-1 capable of 1000 second operation in 1995, the institute grew rapidly and came under the administrative umbrella of the Department of Atomic Energy. Major new programmes in pulsed power, advanced diagnostics, computer modelling, development of RF and neutral beam heating systems etc. also came into being. The industrial plasma activities were reorganised under the Facilitation Centre for Industrial Plasma Technologies and moved to a separate campus in Gandhinagar in 1998.

IPR is now internationally recognized for its contributions to fundamental and applied research in plasma physics and associated technologies. It has a scientific and engineering manpower of 200 with core competency in theoretical plasma physics, computer modeling, superconducting magnets and cryogenics, ultra-high vacuum, pulsed power, microwave and RF, computer-based control and data acquisition and industrial,

environmental and strategic plasma applications. Institute for Plasma Research is an autonomous R & D organization under the authority of Department of Atomic Energy (DAE), Government of India situated near west banks of river Sabarmati in Gujarat, India. This institute is largely involved in theoretical and experimental studies in plasma science including basic plasma physics, magnetically confined hot plasmas and plasma technologies for industrial application. The institute owns two operational tokamaks (a machine for controlling thermonuclear fusion) - ADITYA and Steady State Tokamak (SST) - 1. FCIPT, ITER-India and CPP-IPR, located in Gandhinagar and Guwahati are three divisions under IPR.
